PROJECTS

Full Stack Web Development | Jan 2020 - Apr 2021

Insta-Chat: Built a web-based chat application using Socket.io, powered by REST API architecture. There by storing their registration details and messages in the database which is mongodb. Not just building it on localhost, but also deployed it online using GIT and Heroku platform.
(Link: https://instachatnow.herokuapp.com/)
Used HTML, CSS, Javascript, NodeJS, MongoDB, REST API, GIT, Socket.io.

Python | Jul 2018 - Nov 2018

ATM Management system: Main objective of this project was to prepare a software of an ATM. We've used sqlite3 through which we have stored the details of the account in database.
